

Aerodynamics & Regulations - Who Needs Them?

A discussion about aerodynamics can be pretty boring and when you talk about regulations your eyelids slam shut. Did you know that most of our accidents are caused by little of no knowledge of how that wing flies and what has a dramatic effect on its ability to keep you aloft. You will be able to answer all the questions without raising your hand. Through the magic of audience polling we can see how many pilots really understand aerodynamics & regulations.

Directions: Northbound on Hwy 97 the restaurant is on your left just past E. 7th Street. Southbound on Hwy 97 the restaurant is on your right just past the intersection of Hwys 20 and 97.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
